

CITY OF LODI

PUBLIC WORKS DEPARTMENT

COUNCIL COMMUNICATION

TO: City Council
FROM: City Manager
MEETING DATE: June 1, 1988
AGENDA TITLE: Approve Color for Water Tank, North Main Street and East Locust Street

RECOMMENDED ACTION: That the City Council approve the color of "Silver Fox" for the new water tank.

BACKGROUND INFORMATION: Public Works staff has reviewed color charts and coating engineering data and has spoken with the tank (PDM) and the coating (Tnemic) manufacturers and the architects who prepared the Parks and Recreation Corporation Yard Master Plan. The following four colors were presented to the Council at the shirtsleeve meeting on May 24, 1988. An informal poll indicated the predominate #1 choice (4 out of 5) was "Silver Fox".

BC72 Silver Fox
BG82 Silver Pearl
BG72 Overcast
AH82 Daily Bread

All finishes are semi-gloss.

The selection of the four alternates is based on the following:

- ° High Light Reflectance Value - This is indicated by the last two digits of the color code. High reflectance reduces interior heat buildup and lengthens the life of the interior coating. This eliminates the darker shades of any color.
- ° Color Retention - Colors with reds and yellows (including blends such as green) will not hold as well as the others. Blues are the best in this regard. This eliminates the violets, greens and warmer (reddish) shades of brown. We want a color that will fade gracefully and not show major differences around the tank.
- ° Compatibility with the Skyline - Since Lodi is so flat, there is no backdrop other than the sky. Most views of the tank will be from the surrounding blocks and will include mostly sky.

APPROVED:

THOMAS A. PETERSON, City Manager

° Compatibility with the Tank - Welded seams are more apparent on very light, glossy colors. This eliminates white and the pale off-whites.

Samples of the recommended colors are attached.
